## Some things are too important to leave unsaid.

You know some of the stories. You know the person, or the version they've shown you. This book is for the rest.

What I Want You to Know is a guided legacy journal for a parent or grandparent to fill in by hand, for the people who will keep it. It starts with the house they grew up in and ends with a letter. In between are the questions nobody thinks to ask: what they were afraid of, what they changed their mind about, what they never said, what they hope you'll forgive, and what to do on the days you miss them.

Two hundred prompts, one to a page, with room to actually write. Pages where the family adds questions of their own. And a section near the end where the writer stops answering and speaks directly to you.

Their memories. Their wisdom. Their handwriting. Kept, for the people who will want it most.

**Write it while you're here. Keep it forever.**
